

FF NOTICE

What it does:

This is used with the Batch Notice Form template used by the Print Pending Notices report. It pulls in every document that is pending notice.

Used in template:

```
<div class="fsIndent1">
DATE: @x/CURRDATE/|||
@v/subname/|||
</div>
You are hereby noticed of the following:|||
@v/notice/|
</div>
```

Variables				
Name	Type	Action	Length	Prompt
CURRDATE	@X/	FF CURDATE/01	20	n/a
NOTICE	@V/	FF NOTICE/01	99	n/a
SUBNAME	@V/	FF SUBPNAM/10	99	n/a

What the user sees:

Nothing, this is a batch process that runs automatically.

Output:

Copies of orders and docket entries that were pending notice.

FF NOTICE/01 - Include all pending notices for a person

This function will automatically include all documents and docket entries pending for the witnessPersonID specified in parms.
