

## Rule GAW072 – Update State Decision

---

Apply when: Documents database file

Subtask: F

Standard GAWDBObject subtasks:

'C' - on object creation

'R' - before referential integrity

'i'/'I' - before/after insert

'u'/'U' - before/after update

'd'/'D' - before/after delete

Sequence: 5 (Controls the order in which rules will be applied for a given subtask)

Java class:\*

This is meant to act as a trigger to update the state's decision and decision date when a document is file stamped. It should only be used upon file stamp (F) of the Documents record. This function purposely uses objects, so all other rules are executed when updates occur. The documents that cause updates are determined in the 'RULEPARMS' entry of the 'DEFAULTS' table.

Valid properties are:

UpdateStateDecision.template=state's decision

Template should be the uppercase template name.

State's decision should be the decision you want set.

UpdateStateDecision.overwrite=<Yes/No>

If No, existing values will not be overwritten.

The default value is Yes.

### Rule Setup:

Apply when	Sub-task	Seq	JAVA class
<u>Documents</u>	F	5	equest.rules.UpdateStateDecision

### Rule Parms:

UpdateStateDecision.overwrite=No

UpdateStateDecision.\*\*P-DEL=PET

UpdateStateDecision.JDO-IA=IA

UpdateStateDecision.\*\*P-NOTIFY=SDP
